

## Installing Election Reporting Manager (ERM)

This document contains installation instructions for Election Reporting Manager and contact information for customer support. **Before you begin installation close all programs and turn off virus protection software to prevent installation conflicts.**

### Minimum System Requirements:

- Pentium IV 1.00MH
- 2.0-GB hard drive
- 256 MB RAM
- 24x CD-ROM
- Super VGA (800x600) or higher – resolution video adapter and monitor
- Windows 2000 or XP
- 3.5-inch disk drive
- Printer
- Keyboard and Mouse

**NOTES:** If installing Election Reporting Manager on a system where ERM 6.3.2 or below is present, you must first uninstall the previous versions of RM/COBOL, COBOL-WOW and ERM.

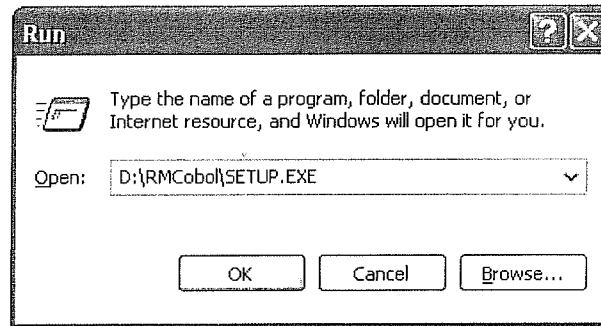

If you have ERM 6.4 or above already installed, you do not need to uninstall or install RM/COBOL or COBOL-WOW (skip steps 1 and 2).

RM/COBOL and COBOL-WOW are used for both Hardware Program Manager and Election Reporting Manager. RM/COBOL and COBOL-WOW only need to be installed once.

### You must install in the following order:

#### 1. RM/COBOL

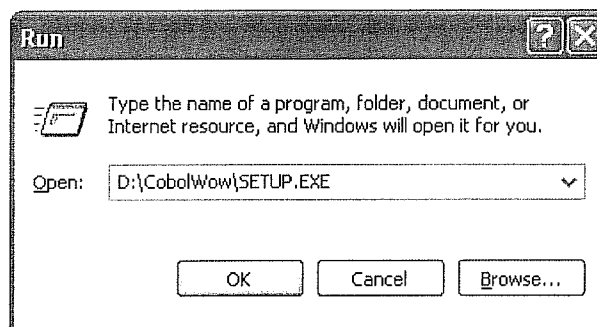

- Click **Start** on the Windows taskbar and select **Run** to open the Run window.
- Browse to the CD Rom Drive on your PC. Look for the **RM/COBOL** folder and double click on it to open up the folder. Look for the **Setup.exe** and double click on it to place it on the open path:

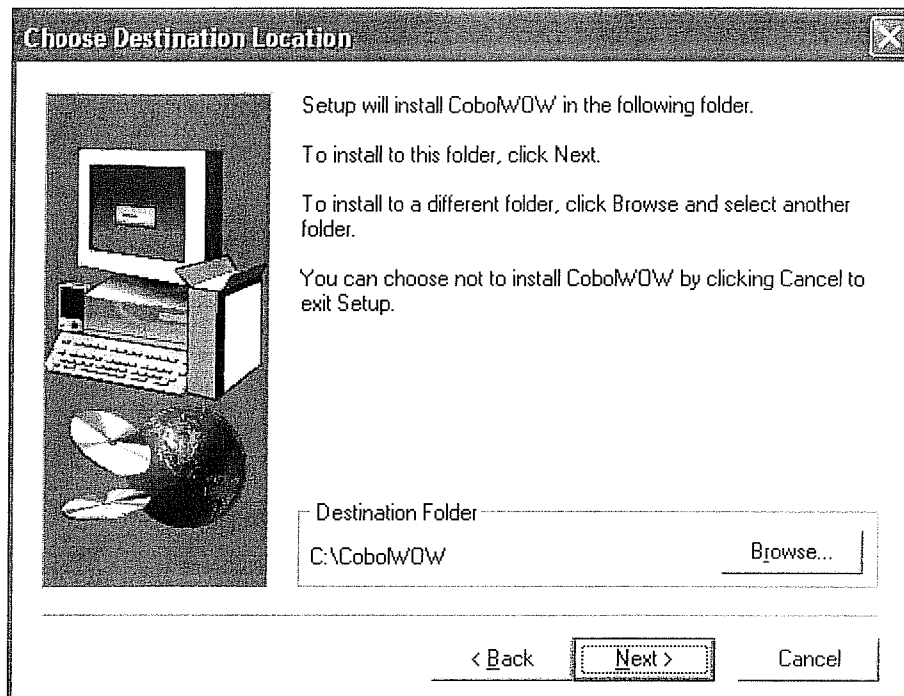

- Click **OK** to start Copying Files.
- **License Files:** both Rmcobol and Cobol wow requires a license file, which is provided on the CD. The license file is the same for both programs. When prompted for the license file location, Type: D:\Liant.lic ("D" is your CD-ROM drive letter). The license files are kept on the root of the CD.
- Upon completion of ERM select the box if you want to view the README file included with the program. Click **Finish** to complete the setup for ERM.

## 2. **COBOL-WOW**

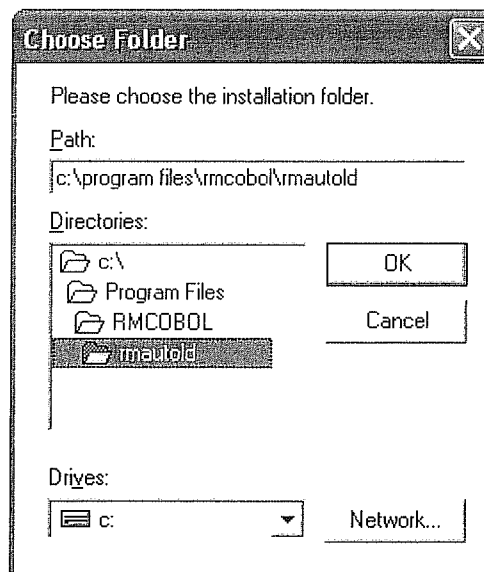

- Click **Start** on the Windows taskbar and select **Run** to open the Run window.
- Browse to the CD Rom Drive on your PC. Look for the **COBOL-WOW** folder and double click on it to open up the folder. Look for the **Setup.exe** and double click on it to place it on the open path:

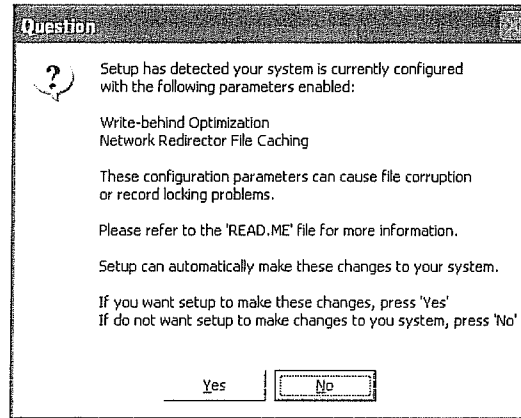

- Click **OK** to begin the installation
- **IMPORTANT:** Cobol wow needs to be installed into a specific directory. During the installation when the following screen appears:

- Click browse and Type: **C:\Program files\Rmcobol\rmautold** in the path line. When asked if you want to create this directory answer “yes”.

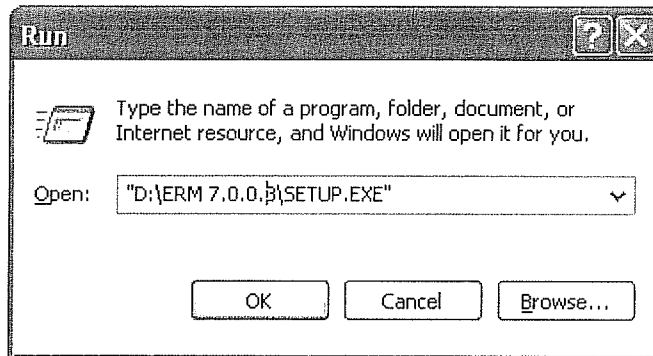

- If you encounter the Question window shown below regarding Write-behind Optimization, ES&S recommends you select **yes** to disable Write-behind Optimization.

Then click OK and finish the installation.

### 3. Election Reporting Manager

- Click **Start** on the Windows taskbar and select **Run** to open the Run window.
- Browse to the CD Rom Drive on your PC. Look for the **ERM** folder and double click on it to open up the folder. Look for the **Setup.exe** and double click on it to place it on the open path:

- Click OK to start Copying Files.
- Upon completion of ERM select the box if you want to view the README file included with the program. Click **Finish** to complete the setup for ERM.

**Note:** The README file contains valuable information about the latest version of ERM.

### **To start Reporting Manager**

- Click the Windows **Start** button.
- Click **Programs**.
- Click the program folder for Reporting Manager. The default folder is **Unity Election Systems**.
- Click **Election Reporting Manager**.

### **Contacting Customer Support**

If you encounter problems while installing ERM or have questions call Customer Support at 1-877-377-8683.
